PROTERMINAL

POLISHED AND BRUSHED
STAINLESS STEEL AISI 304/1.4301-V2A

PROTERMINAL is a professional edging profile used mainly to join similar or different floor materials (e.g. tiles/tiles – tiles/parquet/marble/laminates/carpeting /linoleum, etc.) of differing thickness.
PROTERMINAL in stainless steel is also used to protect steps and decking, as a floor edging profile and skirting covering. Match with PROLISTEL strips in stainless steel AISI 304/1.4301-V2A with polished or brushed and in aluminium with anodized or polished chrome finish.

AC - Polished stainless steel AISI 304/1.4301-V2A
**ACS** - Brushed stainless steel AISI 304/1.4301-V2A

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the PROTERMINAL with the same height as the thickness of the covering. **2.** Apply the adhesive onto the area of application of the profile. **3.** Lay and align the profile pressing the perforated flange into the adhesive. **4.** Lay the tiles, aligning them so that the top edge of the profile is "flush" with the tile. **5.** Use the adhesive to seal any empty interstices.

SUITABLE FOR USE IN CONTACT WITH FOODSTUFFS.

PROGRESS® PROFILES

***** = Production on demand with minimum quantity of 100 pcs. Production delay 4/5 weeks. Price to be agreed

Prices are referred to whole packs 10% increase for minimum orders of 10 Pcs 20% increase for orders of less than 10 Pcs.

PROTERMINAL

PROTERMINAL are manufactured with the same forms and sections, as well as in the very resistant material, the stainless shiny steel 316/1.4401-V4A, suitable for outdoors and marine environment with much presence of saltiness and considerable atmospheric agents. They are used as protection for the external angles of tiles, in order to separate or to create the separating joints in the pavements, to terminate the finishing of wall coverings, for platforms, stair steps, bathtubs, etc. They guarantee the impeccable work, ensuring considerable aesthetic effect as well. They strengthen the tile edge and prevents from chipping and breakages. Required by new European regulations on safety and accident prevention in public and private places.

PROTERMINAL

NATURAL ALUMINIUM AND
ANODIZED SILVER ALUMINIUM

PROTERMINAL is a professional edging profile designed to protect and decorate the outside corners of tile, mosaic and marble coverings of differing thickness.
PROTERMINAL in aluminium is also used to join different floor materials and to protect steps and decking. Excellent as the edging trim skirtings and for bathroom and kitchen wall coverings. Match with PROLISTEL ALL strips in anodized aluminium with silver and polished chrome finish and with PROLISTEL ACC strips in AISI 304-1.4301 stainless steel with polished or brushed.

PROFINAL

POLISHED, BRUSHED AND SANDED
STAINLESS STEEL AISI 304/1.4301-V2A
PROFINAL is a profile in stainless steel AISI 304/1.4301-V2A polished, brushed and sanded. It is available in three widths 8, 10 and 12.5 mm. Ideal for joining two types of floor on the same level (e.g. tile/tile or tile/wood), creating a decorative separating profile. It is also suitable as a step nosing or to create a decorative strip in the covering. It protects the edge and withstands high loads and frequent traffic.

PROFINAL
NATURAL, POLISHED,
CHROMED AND ANTIQUE BRASS
PROFINAL is a profile in natural, polished, chromed and antique brass. It is available in three widths 8, 10 and 12.5 mm. Ideal for joining two types of floor on the same level (e.g. tile/tile or tile/wood), creating a decorative separating profile. It is also suitable as a step nosing or to create a decorative strip in the covering. It protects the edge and withstands high loads and frequent traffic.

PROJOINT

NATURAL AND POLISHED BRASS

PROJOINT is a brass profile for joining two floors at the same level. It can be laid with mortar or glue/adhesive. The head thickness allows perfect smoothing and sanding of over 3 mm. It is usually used for tile-wood-marble-Venetian-Palladian floors. Available in various heights and widths. The vertical arrowhead in the PIT 510 and PIT 514 version allows excellent anchorage with the adhesive.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose "PROJOINT" according to the desired height.
2. Cut "PROJOINT" to the desired length.
Mortar laying
3. Cut with a trowel the fresh screed following the floor edges.
4. Apply the profile inside the fresh screed taking care to align it with the surface of the floor. After laying the joint should be 0,5 mm below the floor covering surface. **5.** Fill the joints between the profile and the tiles with grout, in order to avoid water stagnation. Remove immediately all grout remains from the profile surface.
Adhesive laying
3. Apply the adhesive on the support where the profile will be laid. After laying the joint should be 0,5 mm below the floor covering surface. **4.** Lay the tiles aligning them with the profile leaving a 2 mm joint. Remove immediately all the remains of adhesive from the profile surface. **5.** Fill the joints between the profile and the tile with grout, in order to avoid water stagnation. Remove immediately all grout remains from the profile surface.

PROSLIDER WOOD

NATURAL OAK
WITH ALUMINIUM BASE

PROSLIDER WOOD is a sloping terminal transition profile in real natural oak with glued-on, punched aluminium base, designed to join different height floors in a perfect, stepless way. This particularly sturdy profile withstands and supports high loads and frequent passage of manual trolleys and vehicles in addition to protecting the edge of the higher floor. Available in various heights to accommodate all differences in level.

PROLEVALL 305

POLISHED STAINLESS STEEL 1.4016
AND POLISHED BRASS
WITH SELF-ADHESIVE AND PUNCHED

PROLEVALL 305 is a transition/terminal profile for floors of medium thickness (from 3 to 7 mm), used to join and compensate two floors of differing height, material and thickness. Ideal as a finishing terminal, it covers flaws and chipping or splintering of tiles, wood and carpeting. Available in stainless steel 1.4016 and polished brass. A protective film protects the finish of the 2.70 m long bars with either self-adhesive backing or punched for fixing with screws and anchors. The 93 cm blister pack version (self pack) is shrink-wrapped with bar code.

"AS" at the end of the product code = Item with adhesive
"FS" at the end of the product code = Punched Item

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

Adhesive version
1. Choose the suitable profile and cut it to the necessary length. **2.** Degrease, wash and clean the solid surface thoroughly. **3.** Remove the protective paper from the adhesive. **4.** Lay the profile by applying pressure evenly over the whole surface without using a hammer.
Punched version
1. Choose the suitable profile and cut it to the necessary length. **2.** Mark the position of the holes using the existing holes in the profile as reference. **3.** Insert the screw anchors into the drilled holes. 4. Fix the profile using flathead screws suitable for the relative slots in the profile.

PROLEVALL 4413

PROLEVALL 4413 are transition profiles in polished extruded brass and anodized aluminium available in the self-adhesive or punched versions. They are used to give a clean-cut, elegant finish when joining and compensating differences in level of floors that are already laid and in differing or same materials e.g. ceramic tiles-wood-parquet-marble, etc. They join and compensate a thickness between 13 and 15 mm. **PROLEVALL 4413** ensures a perfect finish with little height, covering any flaws created during laying, while the contoured edges guarantee perfect adherence to the floor.

PRONIVO

transition profiles

ANODIZED ALUMINIUM

PRONIVO is a transition and edging profile with a rounded shape in anodized aluminium with tap-down edge. It is ideal to give a clean-cut, elegant finish when joining and compensating differences in level of floors that are already laid and in differing or same materials e.g. ceramic tiles-wood-parquet. With its rounded shape it compensates for differences in thickness between 7 and 13 mm where no profile was installed at the time of laying. **PRONIVO** ensures a perfect finish and is easy to lay with the self-adhesive backing guaranteeing perfect adherence to the floor.

PROCOVER 1045 ALL

ANODIZED AND POLISHED
SILVER, CHROME AND GOLD ALUMINIUM

PROCOVER 1045 ALL is a joint cover profile in anodized aluminium. It is applied at the end of the laying process between two adjoining floors placed at the same level, with a gap of 3 to 6 mm between the two kerlite /laminam/ or thin ceramic tile floors laid with the adhesive. It protects the external edge of the floor/covering. It is easy to lay and aesthetically pleasing. The design of the profile with lower vertical arrowhead part allows excellent anchorage with silicone / adhesive.

profiles for low thicknesses

PCR...1045
scale 1:1

10 mm
H 4,5 mm
EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS
1. Choose "PROCOVER 1045 ALL" in the desired finish considering a side lap of 2/3 mm. **2.** Fill the gap with single-pack silicone or with the adhesive used for laying the floor. **3.** Bury the profile into the adhesive, making sure that both side laps of the profile rest on the coverings to be joined.
IMPORTANT: Take care of the external edges of the aluminium "PROCOVER 1045 ALL". They must be protected from aggressive substances such as adhesives and sealants and from smoothing or scraping action.

PROCOVER

**POLISHED AND BRUSHED
STAINLESS STEEL AISI 304/1.4301-V2A**

PROCOVER is a joint-cover profile in stainless steel (polished or brushed) with aluminium supports. It is applied at the end of laying two adjoining floors with the same height, having left a 6 - 24 mm gap between the two floors set in a thin bed of adhesive. It protects the outside edges of the floor/covering. It is easy to lay and attractive. The design of the profile with lower vertical arrowhead part allows excellent anchorage with the silicone/adhesive. The aluminium structure with the stainless steel lining provides it with a high level of resistance to cuts and deformation.

PROGRESS PROFILES

PROLEVALL 25-35-38-50

ANODIZED GOLD AND SILVER
ALUMINIUM WITH SELF-ADHESIVE AND PUNCHED

threshold - joint-cover profiles

PROLEVALL 25-35-38-50 are joint – covers in anodized aluminium with gold, silver and bronze finish in various widths with a more or less knurled flat surface, available with self-adhesive backing or punched in various lengths. They are used to join floors of the same or differing material e.g. ceramic tiles, wood, marble, parquet or laminated, mainly to cover flaws created during laying or expansion joints.
The chamfered edges ensure perfect adhesion to the floor, while the flat top allows perfect door closure. Recommended for dwellings and public environments with intense pedestrian traffic. Easy to lay; the high-strength elastomer adhesive ensures an excellent grip.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

COLOURS

AA - Anodized silver alum.
AO - Anodized gold alum.

ON DEMAND MINIMUM 100 PCS by color and height

AB - Anodized bronze alum.
AT - Anodized titanium alum.
CH - Anod. champagne alum.
**SB** - Anod. sand aluminium
(Prices to be agreed. Production delay 4/5 weeks)

1. Choose the suitable profile and cut it to the necessary length.
Adhesive version
2. Degrease, wash and clean the solid surface thoroughly. **3.** Remove the protective paper from the adhesive. **4.** Lay the profile by applying pressure evenly over the whole surface without using a hammer.
Punched version
2. Mark the position of the holes using the existing holes in the profile as reference. **3.** Insert the screw anchors into the drilled holes. **4.** Fix the profile using flathead screws suitable for the relative slots in the profile.

* = Production on demand with minimum quantity of 100 pcs. Production delay 4/5 weeks. Price to be agreed

Prices are referred to whole packs, 10% increase for minimum orders of 10 Pcs, 20% increase for orders of less than 10 Pcs.

PROMOQUETTE

ANODIZED GOLD AND SILVER
ALUMINIUM WITH OR WITHOUT SELF-ADHESIVE

PROMOQUETTE is an anodized aluminium rounded edging profile with tap-down edge, which is ideal for the clean-cut, elegant finishing of carpeted floors. The carpeting is inserted inside the curved/rounded section, which is then pressed down until the carpeting is secured, thereby also protecting the edge. **PROMOQUETTE** ensures a perfect finish, covering any flaws created during laying and protecting the edge. Easy to lay with the self-adhesive backing ensuring perfect adherence to the floor.

PROMOQUETTE FIX

ANODIZED GOLD AND SILVER
ALUMINIUM PUNCHED OR NOTCHED

PROMOQUETTE FIX s a profile in anodized aluminium made as a terminal profile to edge carpeted floors held under tension or simply laid with double-sided adhesive tape. Two versions are available: notched or with holes/notches for laying under tension and then permanently fixed with screws/nails; or the punched version to edge without holding under tension. **PROMOQUETTE FIX** ensures an impeccable finish to the edge of carpeting that is not always perfectly cut. It speeds up laying time and the result is attractive.
