

PROCOVER

POLISHED AND BRUSHED
STAINLESS STEEL AISI 304/1.4301-V2A

threshold - joint-cover profiles

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the "PROCOVER" with the width suitable for the gap between the two floors to be joined, taking into consideration 2/3 mm side lap. 2. Fill the gap with single-pack silicone or with the adhesive used for laying the floor. 3. Bury the profile into the adhesive, making sure that both side laps of the profile rest on the coverings to be joined.

PROCOVER is a joint-cover profile in stainless steel (polished or brushed) with aluminium supports. It is applied at the end of laying two adjoining floors with the same height, having left a 6 - 24 mm gap between the two floors set in a thin bed of adhesive. It protects the outside edges of the floor/covering. It is easy to lay and attractive. The design of the profile with lower vertical arrowhead part allows excellent anchorage with the silicone/adhesive. The aluminium structure with the stainless steel lining provides it with a high level of resistance to cuts and deformation.

POLISHED STAINLESS ST. AISI 304/1.4301-V2A
with protective film - bar length 2,7 lm
(PCRAC 1499 - bar length 0,90 lm) - 4/10 mm

Article	Pcs/Pack	L x H mm

PROCOVER

POLISHED, CHROMED AND ANTIQUE BRASS

threshold - joint-cover profiles

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the "PROCOVER" with the width suitable for the gap between the two floors to be joined, taking into consideration 2/3 mm side lap. 2. Fill the gap with single-pack silicone or with the adhesive used for laying the floor. 3. Bury the profile into the adhesive, making sure that both side laps of the profile rest on the coverings to be joined. Profiles in natural or polished brass may be subject to oxidation in environments with high degrees of humidity. Resulting marks may be easily removed by polishing the profiles with specific products to be found on sale such as Sidol, Smac and similar.

PROCOVER is a joint-cover profile in polished, chromed and antique brass. It is applied at the end of laying two adjoining floors with the same height, having left a 6 - 24 mm gap between the two floors set in a thin bed of adhesive. It protects the outside edges of the floor/covering. It is easy to lay and attractive. The design of the profile with lower vertical arrowhead part allows excellent anchorage with the silicone/adhesive.
